## Educational field visit

Some of the students from 2<sup>nd</sup> year of the Department of Design (Ceramic & Glass) were accompanied by few teachers for a local field visit on 24<sup>th</sup>. January, 2020.

Students visited a very prominent ceramic factory CONFETTI.

Confetti is known for commercial production of ceramic based utility and decorative items blended with artistic visual approach.

Intention was to have a personal experience about making, firing and glazing in large scale. Students also had an opportunity to have a perception on how a ceramic factory can be setup for large scale production.

This experience of infrastructure would help them developing confidence, technical expertise and future plan.
