# DIGITISATION INITIATIVES BY VISVA-BHARATI LIBRARY NETWORK

## 1. Introduction and background

Visva-Bharati situated in Santiniketan is a Central University and an institution of national importance. Visva-Bharati, originally established by Rabindranath Tagore in 1921, had already a collection of books to which his personal collection was added on his death in 1941. Ten years later in 1951 Visva-Bharati was declared as Central University by an Act of the Parliament. Thus, the Library of Visva-Bharati came to inherit a collection of very valuable and rare books over the period of 94 years. It has a collection of over 8 lakh books today (*vide Enclosure -1* for Brochure on the Library Network).

Following is a project proposal for digitization of rare books at various libraries under the Visva-Bharati Library Network. So far 29,687 copyright books from Central Library, Sangit, Rabindra and Kala Bhavana Libraries have been digitized as action taken on this issue proposed in the meeting held by the President of India, in his capacity as the Visitor of Visva-Bharati on 1 October 2004. The task has been taken up in 2005 as part of the Mega Digital Library Project of India through an agreement of Preferred Partnership Programmed between C-DAC and Visva-Bharati. All these digitized books have been uploaded in the server of the Library Network and are accessible to all through intranet under 'Digital Library' Link: <http://172.16.2.5/xmlui>. The creation of Digital Library with separate DNS to link with NDLI is under progress, hope execution will be done very soon.

### 1. Objectives:

The objectives of the digitization and there by Digital Library may be noted as:

- i. To archive rare and copyright free available in various libraries at Visva-Bharati in electronics media i.e. in CDs / DVDs as well as Web hosting at Visva-Bharati Library Network using WebOPAC / Open Source Software (DSpace).
- ii. To make the digitized materials available to the users throughout the world for promotion of scholarship.
- iii. To preserve to cultural heritage of Visva-Bharati, Santiniketan in particular and Knowledge in general.

## 2. Initiatives taken so far:

- a) As part of mega digital library project 29687 number of old and rare copy right free books of Central Library, Rabindra Bhavana, Kala Bhavana and Sangeet Bhavana Library Visva-Bharati have been digitized. Initially, received DVD of digitised books received from C-DAC (.tiff format), Kolkata who was responsible for the work by GOI. Thereafter, all the DVDs have been uploaded in the library local server and made accessible to the users through Intranet (<http://172.16.2.5/xmlui>) and Internet (<http://14.139.211.2/xmlui>).
- b) There are around 40000 thousand more old and rare copy right free books which needs to be digitised and proposal has been sent to Indian Archives for necessary consideration during 2015-16.
- c) For digitization of 1600+ old PhD theses necessary proposal has been sent to UGC through INFLIBNET during 2015-16. On principle UGC accepted the proposal and grant amounting to Rs. 17.97 Lakh, but amount has not yet been reached to VB Accounts. Library is with regular communication with UGC through INFLIBNET.
- d) On requirements of the Academics through the year library has trying to digitize few books without having any basic infrastructure. All these books are also made available through Intranet (<http://172.16.2.5/xmlui>) and Internet (<http://14.139.211.2/xmlui>).

## 3. The specifications of the Digitalisations are as follows:

### A. *Input Specification:*

- i. Majority of the documents are of A4 size, and the rest are of Legal, A3 to A2.
- ii. Documents are old, fragile, deteriorating, rare and brittle and may include charts diagrams, photographs, illustrations etc. Some of the pages of the old books/documents have stain-marks and worm marks.
- iii. The pages of some books/documents have become translucent due to aging.

### B. *Modalities of Digitization:*

- a. The entire work of digitisation has been done through outsourced external agency deployed by GOI to CDAC and CDAC to Pearl Informatics.
- b. The designated agency will setup the scanning infrastructure and labs in the premises of the Visva-Bharati Library Network, Visva-Bharati, Santiniketan.
- c. The documents for digitisation are identified basically published on and by Tagore and others old and rare books published on are before 1923 and physical conditions & content value of the book(s).
- d. The books should be appropriately prepared for image capture, cleaning, sequencing and numbering etc.
- e. The original pagination format of each type of book/ document will be retained.

- f. Proper editing has to be done to the images to straighten the orientation of the content matter if there is any disorientation existing in the pages of the book/ documents.
- g. The minimum resolution of the digitised images should be 300/600 dpi, centred to within 6 points (1/12 of an inch.) In case of certain documents, which are in precarious condition or brittle in nature, the system and processes should be well defined to ensure that there is no damage to the documents after the image capturing.
- h. If required, the agency/consortium should have the capability to do a high resolution scan of appropriate dpi and then do a loss-less compression and deliver appropriate output resolution of image as specified based on the condition of the documents subject to approval
- i. Coloured charts, diagrams, photos, illustration etc. will be scanned separately wherever applicable.
- j. The images captured will be converted to 1:1 ratio, with uniformity of borders and the content matter will be vertically and horizontally centred on the page.
- k. All images should be captured by face-up book scanning technology or using prism scanner, as deemed appropriate to avoid any damage to the book/ document.
- l. It is also preferred that the latest state-of-art equipment will be used to meet the requirements.

**C. *Output Specifications for Digital Image:***

- a. The final output should be a in 2 formats viz., a) CCITT Group 4 TIFF for black and white images and no compression for grey scale and colour TIFF images, b) composite PDF / A Only one file for each document or book should be collected in cleaned TIFF and PDF / A format with the pages collated as per the original sequence and page integrity.
- b. Uncompressed cleaned TIFF or PDF / A files will be devoid of digital noise, centering, skew, collating, and touch up (as is where basis is).
- c. The removal of digital noise will include removal of worm-marks and stain marks to the maximum possible extent, while keeping the colour information intact. This component of digital restoration will aim at attaining a relatively high level of noise-free state of the digital images.
- d. Relevant metadata will be available for all books/documents in all file formats viz. TIFF, and PDF/A.
- e. The output of the images should be original size of documents 8" x 10" print with 100% scaling factor, i.e. 1:1 ratio.
- f. The output images will be archived on DVDs

**D. *Storage Specifications:***

Images will be archived in duplicate on reliable and best quality DVD. One DVD will be used as service copy and another one as master copy for preservation.

**E. *Metadata:*** There will be Administrative / Technical metadata and Descriptive metadata:

- a. Administrative or technical metadata will incorporate details on original source, date of creation, version of digital object, file format used, compression technology used, object relationship, etc.
- b. Administrative metadata may reside within or outside the digital object. The administrative metadata with appropriate documentation will be maintained.

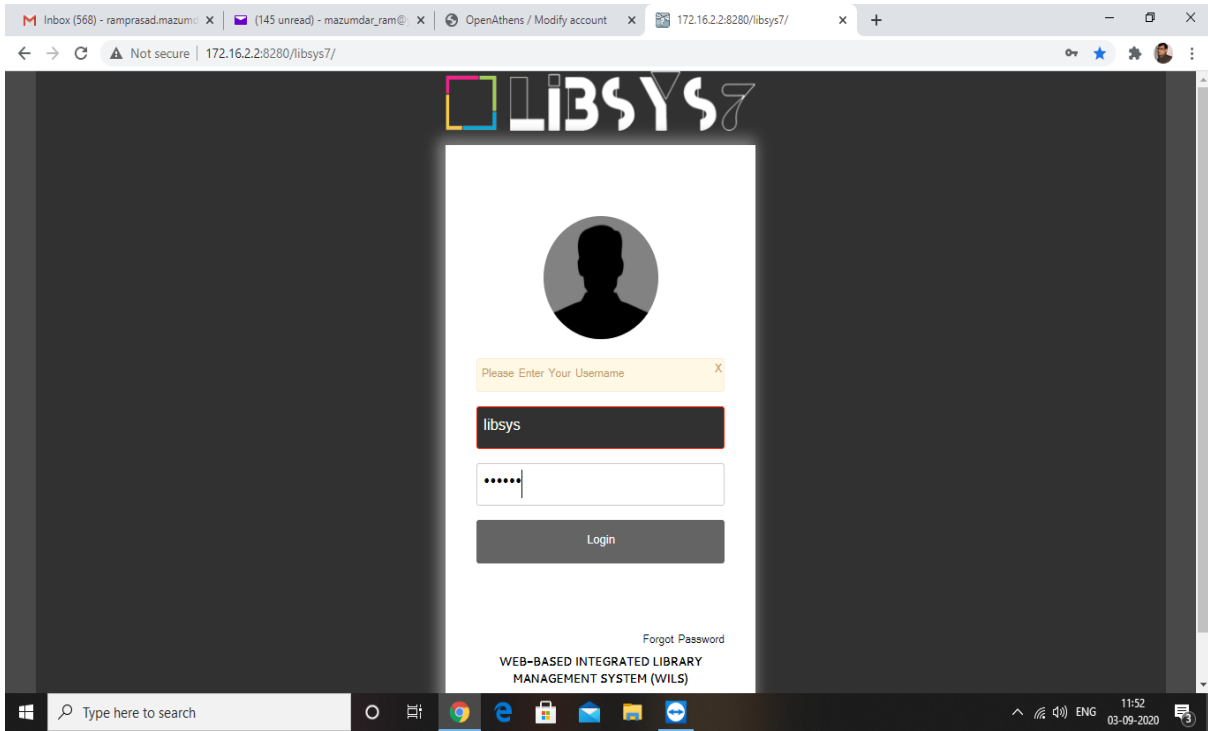

- c. Descriptive metadata describing the content of scanned document will be assigned for each chapter / sub-chapter as per Dublin Core for field structure. It will be created on the fields like: Author, Title, Subject, keywords, Language, Year of Publication, Accession Number, Physical condition of the book, Call Number, Location etc. Catalogue description shall be according to AACR II.
- d. Metadata and indexing of the digitized materials: A thesaurus of keywords / phrases of metadata will be maintained so as to support the searching features. All search features will automatically use the thesaurus for locating the records for not only the word / phrase typed by the user but also all its synonyms.
- e. Standards compliance: Stores item Metadata in Dublin core Metadata Schema. This ensures data can be exchanged with other standards compliant system such as MARC21. MARC is an acronym for Machine-Readable Cataloguing. The five MARC21 Communication formats, Bibliographic Data, Authority Data, Holdings Data, Classification Data and Community information are widely used standards for the representation and exchange of bibliographic, authority, holdings, classification and community information data in machine-readable form.

**F. Database and Retrieval Specifications:**

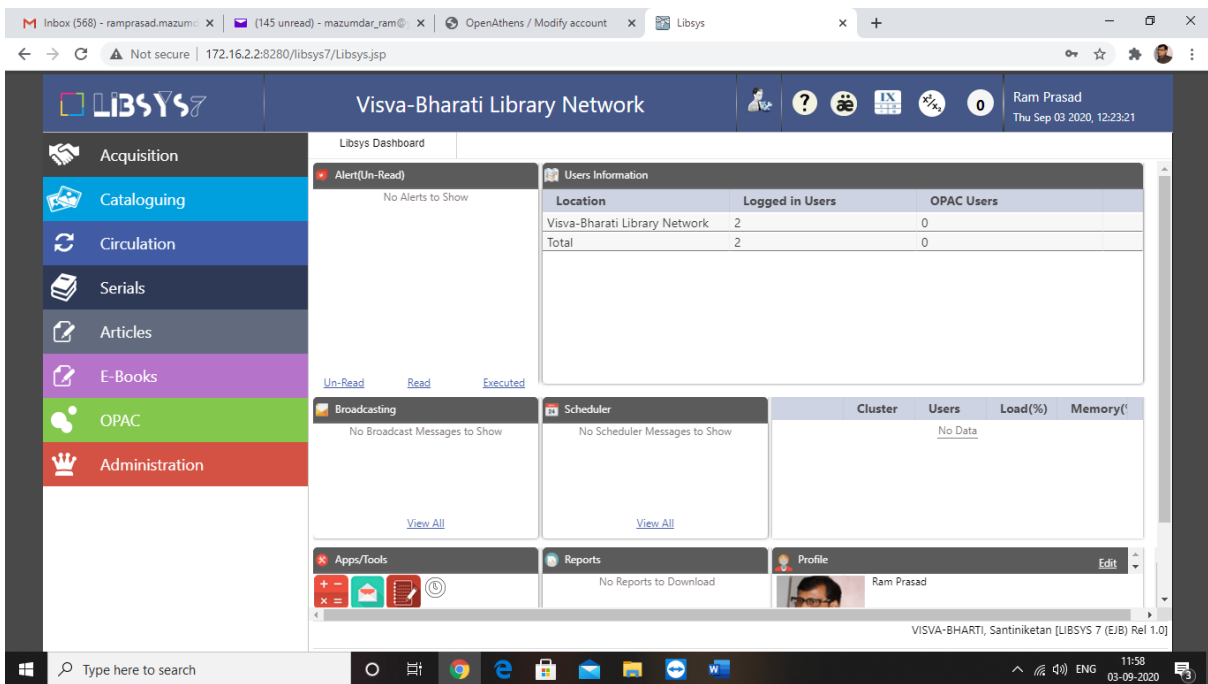

- a. Database as per the existing Schema will be created for all Metadata and corresponding data file identifiers for all files are also to be created. One complete and individual database entry per document will be made for all appropriate fields for which information is available on the documents. Appropriate software will be configured to suit the specific requirement of Visva-Bharati Library Network, Visva-Bharati, Santiniketan along with embedded book reader for the search and retrieval of the database with all digitized material loaded in it.
- b. Indices for searching on various identified parameters (for retrieving documents by Metadata and different combinations of Metadata) will be built.
- c. The data and indices are required to be ported to and integrated with the existing database of the Application.

#### 4. Summary

Visva-Bharati Library Network that holds over 8.55 lakh books in various libraries spread over at different libraries at Santiniketan and Sriniketan. It had inherited very rich and rare collection of books from very inception of the Visva-Bharati 94 years back. An initiative was made in 2005 to digitise books under the prompting of the President of India, the Visitor. Twenty nine thousand six hundred and eighty seven (29,687) were since digitized and uploaded for public access. All those digitized books have been uploaded in the library local server and are accessible to the readers through Intranet (<http://172.16.2.5/xmlui>) and Internet (<http://14.139.211.2/xmlui>). For easy and quick retrieval metadata has been created for digital library. Moreover, all the digitized documents are also searchable and downloadable through OPAC / WebOPAC interface of the ILS named, LibSys. The linking of digitized books with NDLI is under progress, library is waiting from separate DNS to develop an exclusive link for Digital Library.

With a substantial increase in the numbers of English language learners in schools, particularly in countries where English is the primary use first language, it is vital that educators are able to meet the needs of ethnically and linguistically changing and challenging classrooms. However, despite the recognition of the importance of effective leadership for successful teaching and learning, there is a lack of research into leadership of English for
